Compsn. contains (A) polyolefin resin, (B) polyphenylene ether resin or that contg. polystyrene resin and (C) hydrogenated aromatic vinyl cpd.-conjugated diene cpd. block copolymer. The polyolefin resin is at least one selected from ultrahigh molecular wt. high density PE having a wt. average mol. wt. of at least 1,000,000 or MI of up to 0.1 g/10 mins. (JIS K-6758), ultrahigh mol.wt. random PP having wt. average mol. wt. of at least 1,000,000 or MI of up to 0.1 g/10 mins. and ethylene content of 1 to 5 %, ultrahigh mol.wt. block PP having wt. average mol.wt. of at least 1,000,000 or MI of up to 0.1 g/10 mins. and ethylene content of 3 to 10%, isotactic PP having stereoregularity of at least 93 % as measured by NMR, and polyolefin resin contg. 0.1 to 1.0 pt. 1,3;2,4-p,p'-phenylidene sorbitol or 1,3;2,4-p,p'-alkyl substd. phenylidene sorbitol.

ADVANTAGE - The compsn. has excellent appearance, chemical resistance, thermal resistance, and impact resistance.
